About this document

This document provides information about the known issues, limitations, and the defects fixed in SASVA North Star 2.2.

What's new

Feature	Description
<u>Deprecated Feature</u>	- Removed the Email configuration functionality
User Profile	

Known limitations

This section lists the known limitations of North Star 2.2.

Feature	Limitations
Perform Assessment View	A few files in Code Analysis show Failed to load content
Security Assessment	The Security Assessment process can get into a continuous loop for various background processes, and the UI shows the loading message.
Guideline	The Guideline feature does not work as intended. However, the uploaded documents are stored successfully in the North Star database (DB).
North Star View	Add release > Project Plan preview If the network drops on this page while creating details, user cannot retry or proceed and must recreate the plan/step.
Backlog View North Star View	The Project tab displays data curation in progress for Summary, Code Analysis, Project Diagrams, and Features.

Fixed defects

This section lists the defects fixed in North Star 2.2.

Feature	Defect	Solution
Perform Assessment view	Summary, Code Analysis, Project Diagram, and Feature tabs were displaying error- Repository data curation failed due to {"detail":"Failed while checking for in-progress repos in DB"}	Updated the backend logic to handle the missing repository status
Perform Assessment view	In Detailed Analysis, the Download PDF option displayed an error during download.	Fixed from frontend side
Perform Assessment view	Perform Assessment > View Project screen, branch list was not loading after updating the repository URL.	Updated frontend to control Load Branches button visibility based on URL and token inputs.
NorthStar view	Add release- When a project plan contains more than 22 use cases, an <code>invalid token</code> error occurs, preventing the release plan from completing.	Make sure the token have the appropriate validity
Add Project	While creating a project, the system required a valid token for public repositories.	The system validates repository URL- prompts for token if private repositories, skips token for public repositories. Triggers on-change events of repository field.
Add Project	The Project name drop down frequently pops up during project creation.	Updated pop-up to open and close manually
Backlog view	In Edit Backlog view, selecting a folder under Code Analysis or Detailed Analysis did not display the path.	Added the missing path
Perform Assessment	In the Edit Perform Assessment project, clicking on Organization URLs showed the + icon (for adding new URLs) as inactive	Modified condition for enable/disable

Feature	Defect	Solution
Backlog view	While creating a Backlog view project with public repositories, the Load Branches button appeared inactive.	Updated button enable conditions to validate all mandatory fields

Documentation

Following are the other SASVA 2.2 release documents:

	Module name	Document name	Format
1	IDE Plugin documents	a. Release Notes for Visual Studio Code	PDF
		b. User Guide for Visual Studio Code
