About this document

This document provides information about the known issues, limitations, and the defects fixed in SASVA North Star 3.0.

What's new

Feature	Description
<u>Deprecated Feature</u>	- Removed the Email configuration functionality
User Profile	

Known limitations

This section lists the known limitations of North Star 3.0.

Feature	Limitations
Perform Assessment View	When multiple users access the application simultaneously or when working with large repositories, the Project Scan process may take longer to complete. Users are required to wait until the scan finishes before proceeding.
Perform Assessment View	A few files in Code Analysis show <code>Failed to load content</code>
Security Assessment	The Security Assessment process can get into a continuous loop for various background processes, and the UI shows the <code>loading message</code> .
Guideline	The Guideline feature does not work as intended. However, the uploaded documents are stored successfully in the North Star database (DB).
North Star View	Add release > Project Plan preview If the network drops on this page while creating details, user cannot retry or proceed and must recreate the plan/step.
Backlog View North Star View	The Project tab displays <code>data curation in progress</code> for Summary, Code Analysis, Project Diagrams, and Features.

Feature	Limitations
Project Backlog View	ML Analysis Gaps: Machine learning analysis is not populating data for certain backlog features, leading to incomplete insights.ts.
Project Backlog View	AHA Tool Integration: When creating a backlog project using the AHA tool, the "Priority Backlog" and "Business Case for Selected Projects" pages fail to populate with data.
Project Backlog View	PDF Download Failure in Detailed Analysis: Attempting to download the detailed analysis PDF results in a font-related error:
Dashboard page	Project List Pagination: Returning to the Projects tab from the North Star View Assessment causes the pagination to show zero values, even when projects exist.
North Star View	Use Case Count Fluctuation: When manually adding use cases after generating details, the use case count may increase unpredictably upon re-generating with selected new and old use cases.
North Star View	Incorrect SCM Message for Non-GitHub Projects: Selecting an unmapped release in a non-GitHub project incorrectly displays a "GitHub only" message. The message should reflect the actual SCM tool configured.
North Star View	Add release: Before Publish release - Testcases field shows blank and displays API error.
North Star View	Agile Assessment Report API Failures: Clicking on Process Assessment → Agile Assessment Report triggers some API calls that fail with a 404 Not Found error.

Fixed defects

This section lists the defects fixed in North Star 3.0.

Feature	Defect	Solution
Backlog view	Too many records to load and show causing out of memory	Optimized view to show only epics and features if more than 1000 backlog items

Documentation

Following are the other SASVA 3.0 release documents:

	Module name	Document name	Format
1	IDE Plugin documents	a. Release Notes for Visual Studio Code	PDF
		b. User Guide for Visual Studio Code	
2	North Star documents	a. Release Notes (this document)	PDF
		b. User Guide	
3	Release Management documents	a. Release Notes	PDF
		b. User Guide	
		c. Administrator Guide
